

Marco E-Z TILT CHAIR

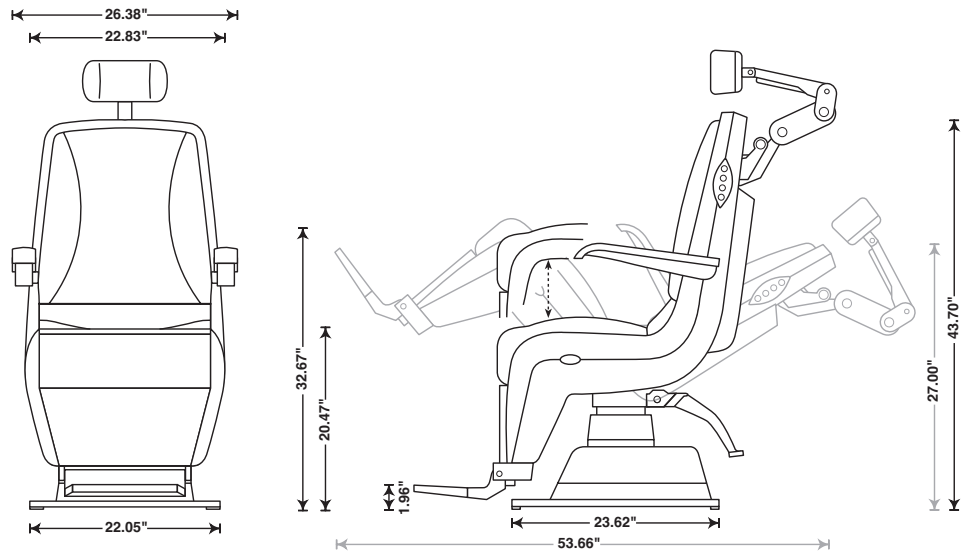

MARCO E-Z Tilt Chair

The Marco E-Z Tilt Chair combines the most simplified manual reclining motion with a new modern, sophisticated appearance. Utilizing an effortless, counterbalancing system, the E-Z Tilt makes reclining any patient easy and instantaneous; no electronic motors to slow you down! The Marco E-Z Tilt also incorporates the only double hydraulic cylinder system in the industry, creating an extended range of elevation - from very low to extra high, that accommodates a full range of patient and practitioner sizes. The sealed hydraulic chair base is a streamlined, low-profile non-leaking system that also eliminates many complicated and unnecessary components, resulting in greater efficiency and reliability.

- Fresh, new innovative design
- Sleek, low profile sealed hydraulic base
- Instantaneous comfortable reclining motion
- Exclusive double hydraulic cylinder system provides an extended 300mm range of motion
- Convenient single-handed and foot operated controls for chair reclining, elevation, rotation, and headrest adjustments
- Unique headrest locking indicator insures patient safety and stability

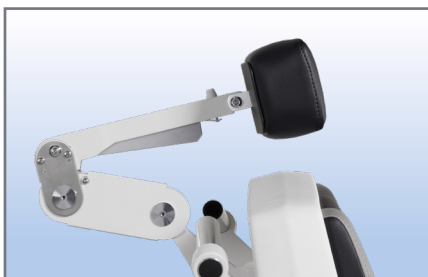

Exclusive telescoping hydraulic cylinder system

Angled push-button recline handles for easier reclining motion

Foot-activated rotation lock can easily be activated from both sides of the chair

Single-handed headrest with special locking indicator

Ergonomically designed arms rotate up for patient flexibility.

Overlay switch panels on both sides of the chair for convenient fingertip adjustments.
